Manuscript Preparation

1. The manuscript should be prepared in Springer format using MS WORD and/or LaTeX templates available respectively in M S Word and LaTeX. The guidelines given here may help you to prepare the manuscript. The preferred format of the manuscript is through LaTeX. You are advised to go through the Manuscript Guidelines provided by Springer for a flawless representation of your work in the article.

2. The figures/graphs/plots in the manuscript MUST be of good resolution (600 dpi or more), tables MUST NOT be in pictorial format. Text in figures should not be too small, and preferably of equal size as the text of the article.

3. Figures, text, or tables MUST be visible within the boundary of the text area of the page and MUST NOT go beyond it.

4. Do NOT use any Social / Academic titles (e.g. Mr., Ms., Dr., Prof., etc) preceding the author names. Do NOT mention the position of a person (e.g., research scholar, student, assistant professor, professor, IEEE member, IEEE student member, etc.) in the affiliation.

5. Mention the full address, affiliation, and email of ALL authors, and specify a corresponding author with the corresponding e-mail ID. [Once an article is accepted, the publisher will send the proofreading of the article to this e-mail]

6. Do not make any page numbering and do not give any running head title.

7. Every article must bear a self-composed independent single paragraph as an Abstract, which MUST NOT bear any citation or reference. Abstract MUST not have a section number.

8. Articles must be written in spell-checked and grammatically correct English.

9. All references, figures, and tables should be numbered in sequence starting from 1 and MUST be duly cited/referred to within the text.

10. Adhere to page size (A4: 8.27"X11.69"), page margin size (top:2.05", bottom:2.05", left/inside: 1.73", right/outside: 1.73"), line spacing ('single'), and font style ('Times'), font sizes (Title: 14pt - bold, Abstract: 9 pt, Keywords: 9 pt, Section header: 12 pt - bold, Subsection header: 10 pt - bold, Table and figure caption: 10 pt - bold, Text body: 10 pt) as prescribed in Springer LNCS template, do not manually alter ANY of these parameters.

11. Deeply verify the referencing style of LNCS, which will help to produce the correct reference format. A reference should bear the following parameters in proper format: author name(s), title of article/book, conference/journal name, volume, issue, page numbers, and publication year.

12. Any article not in format will be rejected without any judgment on its quality.

13. The articles should be the authors' own work. If any work is referred to from others (or another work by the author), proper acknowledgment should be given. Plagiarism of any type, if detected, will lead to rejection of the articles at any time.

14. Strongly advised to follow the guidelines else the paper may finally be REJECTED by Springer at a later stage.
